

## Activated Charcoal Filter Set up

1. Make the filter stable and don't bump it or move it till finished, may take several hrs to complete
2. Test purge,,, pour clean ethanol through the filter till it comes out clear in the capture bottle... Stop,, the filter is now primed, discard the ethanol in the capture bottle and your ready to go,,
3. Dissolve the extract into 95% ethanol and pour through the filter at least 3 times..
4. When satisfied the extract is clean, purge the filter again with clean 95% ethanol to rinse the last bit of extract, out of the filter and into the capture bottle..

Activated Charcoal Granules

Coffee filter paper

Stainless steel funnel

Capture bottle
